ALMA MATER

Hail To Thee, Our Alma Mater, Colorado State.
Memories Are Everlasting Of This Place So Great!
May Thy Green And Gold Unite Us, Loyal Ever Be.
Colorado State, Our Alma Mater, Hail, All Hail, To Thee.

COLORADO STATE UNIVERSITY SEAL

The Colorado State University seal is a modification of the official State of Colorado Seal, approved by the first General Assembly of the State of Colorado on March 15, 1877.

The seal consists of the eye of God within a triangle, from which golden rays radiate. Below the triangle is a bundle of birch or elm rods, wrapped with a scroll and around a battle axe bound by thongs. The scroll is called a Roman fasces and is the insignia of a republican form of government. The bundle of rods bound together symbolizes strength, which is lacking in the single rod. The axe symbolizes authority and leadership. Below the scroll is the heraldic shield bearing across the top three snow-capped mountains. The lower half of the shield has two miner’s tools, the pick and sledge hammer, crossed on the ground.

As the University evolved, the seal was updated to reflect changes to the school’s name. The original name was the State Agricultural College. In 1935, the name changed to Colorado State College of Agricultural and Mechanical Arts. In 1957, the name was again changed – this time to Colorado State University.

The original seal was made of hand-tooled leather. Damaged during the campus flooding of 1938, the original border was cut away in a random and arbitrary fashion and stitched back down on a new piece of leather in a scallop-like manner, giving the seal its current appearance.
**Principles of Community**

The Principles of Community support the Colorado State University mission and vision of access, research, teaching, service and engagement. A collaborative and vibrant community is a foundation for learning, critical inquiry, and discovery. Therefore, each member of the CSU community has a responsibility to uphold these principles when engaging with one another and acting on behalf of the University.

**Inclusion:** We create and nurture inclusive environments and welcome, value and affirm all members of our community, including their various identities, skills, ideas, talents and contributions.

**Integrity:** We are accountable for our actions and will act ethically and honestly in all our interactions.

**Respect:** We honor the inherent dignity of all people within an environment where we are committed to freedom of expression, critical discourse, and the advancement of knowledge.

**Service:** We are responsible, individually and collectively, to give of our time, talents, and resources to promote the well-being of each other and the development of our local, regional, and global communities.

**Social Justice:** We have the right to be treated and the responsibility to treat others with fairness and equity, the duty to challenge prejudice, and to uphold the laws, policies and procedures that promote justice in all respects.

**Land Acknowledgment**

Colorado State University acknowledges, with respect, that the land we are on today is the traditional and ancestral homelands of the Arapaho, Cheyenne, and Ute Nations and peoples. This was also a site of trade, gathering, and healing for numerous other Native tribes. We recognize the Indigenous peoples as original stewards of this land and all the relatives within it. As these words of acknowledgment are spoken and heard, the ties Nations have to their traditional homelands are renewed and reaffirmed.

CSU is founded as a land-grant institution, and we accept that our mission must encompass access to education and inclusion. And, significantly, that our founding came at a dire cost to Native Nations and peoples whose land this University was built upon. This acknowledgment is the education and inclusion we must practice in recognizing our institutional history, responsibility, and commitment.
Fall 2021

Dear Graduates,

Congratulations! On behalf of everyone at CSU – our faculty, our staff, and your fellow graduates and students – I am so excited to celebrate your graduation from Colorado State with you. This is an extraordinary achievement. Savor it, and savor being able to call yourselves alumni of Colorado State University. Our alumni make up a worldwide fellowship of amazing people like you.

You leave here with the knowledge you’ll need to succeed in your chosen careers and the creativity and critical thinking you’ll need to be life-long learners. You will gain wisdom with every experience. You will be ready to transform yourselves when opportunities and challenges arise.

This past year and a half certainly presented you with challenges! But you pushed on to make to this moment – your Commencement ceremony – and to officially receiving the degree that you worked so hard to earn. Your perseverance has already put you on a path to success; your resilient spirit will carry you forward.

This is just one stop in your path. As you move on to the next phases of your lives, you will always be Rams and will remain members of the larger CSU community, characterized by your brilliant minds and great hearts. Ours is a community that extends across our nation and around the globe. And today, more than ever, the world needs your brilliance to confront its increasingly complex challenges.

We are Colorado State University, all of us, together. We are one of the top public research universities in our nation because of you, because of our outstanding faculty and staff, and because of all those who came before us who are part of that growing, globe-spanning community. As a CSU alum, you exemplify the power of access to higher education and leave here prepared to make our world a better place.

I am so, so proud and thrilled for all of you, and excited about your accomplishments as students, your graduation, and the amazing things you will achieve next. Know that you make all of us at CSU proud – today, tomorrow, and far into the future.

Warmly,

Joyce E. McConnell
President

Colorado State University originated in 1870 when the territorial legislature established an agricultural college at Fort Collins. This school qualified for endowment under the Morrill Act of 1862, which provided federal land grants to academic institutions offering instruction in "such branches of learning as are related to agriculture and the mechanic arts" and promoting "the liberal and practical education of the industrial classes in the several pursuits and professions of life." Ideally, land-grant schools would make higher education more useful, accessible, and democratic.

Nearly a decade passed before classes began at Fort Collins, but in the interim, experimental work was conducted on the campus farm. How could the emerging modern sciences of physics, chemistry, and biology be applied to Colorado's distinctive agricultural conditions? Which were the most suitable methods of soil use, irrigation, crop selection, animal care, and pest control? Answers demanded careful study, which an agricultural experiment station would soon provide. Research thus preceded teaching.

On September 1, 1879, President Elijah E. Edwards and a two-member faculty welcomed the first students to the college. In the beginning, a single course of study served all, and the original graduating class – George H. Glover, Leonidas Loomis, and Libby Coy – received degrees on June 5, 1884. By the turn of the century, however, the curriculum included fully developed majors in agriculture, engineering, and home economics, along with fledgling graduate-level work. Dedicated faculty contributed to this development, among them James Lawrence, Clarence Gillette, Theodosia Ammons, and Elwood Mead. Mead, for example, introduced the first instructional program in irrigation engineering to be offered by an American college or university, and Lake Mead, Nevada, commemorates his subsequent professional esteem.

Outreach augmented research and teaching. Knowledge generated in Fort Collins could benefit Coloradans beyond the home campus, and in 1880, the college began offering farmers’ institutes at various locations. Eventually, extension agents would provide locally focused service in all Colorado counties and launch enduring programs, such as 4-H. Research, teaching, and outreach were all key college activities when Charles A. Lory began a 31-year tenure as president in 1909. A former ditch rider, whose family had homesteaded in Colorado, Lory imbued the school with a commitment to practical education and service to the state. During his presidency, enrollments grew from 217 to 2,048, and the college developed into a well-rounded technical institution. By 1940, degrees were available in agriculture, engineering, home economics, veterinary medicine, forestry, vocational education, agricultural economics, and rural sociology. Notable faculty of the Lory era included Inga Allison, Lawrence Durrell, Walter J. Morrill, Isaac E. Newsom, Elizabeth Forbes, and Ruth J. Wattles.

These years also featured extracurricular activities and campus traditions. Fraternity and sorority life, Coach Harry Hughes’ football teams, and painting the "A" all left indelible memories. So did the calamity of the Great Depression, which posed exceptional challenges for Colorado's land-grant institution as it worked to mobilize outreach support for the state's hard-hit rural areas.

American involvement in World War II threw normal college routines into disarray. Enrollments plummeted as students and faculty left Fort Collins for military service. Although the college remained open because of President Roy Green's success in bringing military training programs to the campus, national defense rather than collegiate goals prevailed. Research and extension efforts strongly emphasized agricultural output.

The post-war years saw an influx of veterans attending college on the G.I. Bill. In addition, Cold War tensions led to vastly augmented federal support for scientific research and training. Sponsored projects proliferated, as did graduate programs.

William E. Morgan, who became president in 1949, led the school's emergence as a modern educational institution. A prudent planner, he foresaw the need for major campus expansion, identified areas of excellence, and encouraged their development. In 1955, the college awarded its first Ph.D. degree (to Adrian R. Chamberlain) and two years later changed its name to Colorado State University. Curricular improvements in the liberal arts, library acquisitions, and international programs gave legitimacy to the title of "university."

During the 1960s, enrollments soared from 6,131 to nearly 17,000, enabling gifted teachers, such as Willard Eddy and Meyer Nathan, to influence numerous students. Young people of this era also seemed determined to exercise an influence of their own by challenging perceived injustices. Concerns about racism, military power, environmental despoliation, discrimination against women, and rules governing student behavior provoked protests.
Adrian R. Chamberlain succeeded William E. Morgan as president in 1969 amid campus unrest that culminated in the burning of the Old Main building in 1970. Chamberlain worked to consolidate university changes during a period of less rapid growth. By the conclusion of his 11-year tenure, the boom in American higher education had ended, along with the moral fervor of a youthful generation. Good jobs now elicited greater concern than good causes.

During the 1980s, Colorado State University faced many questions. Which programs would best serve a dynamic modern society? Could traditional commitments to agriculture and rural Colorado be balanced against escalating urban needs and international involvements? What role should computers and electronic networks play in facilitating education? The university addressed these and other critical issues despite administrative upheaval that featured three different presidents within a four-year period.

The 1990s imposed both new and traditional demands upon Colorado State University. Particularly notable was the flood of July 28, 1997. Despite devastating damage to the campus, including Morgan Library and the Lory Student Center Bookstore, CSU managed to start Fall Semester classes on time. This achievement reflected remarkable effort, which President Albert Yates defined as a challenge to make the university into “a better and stronger place in all of its dimensions.” During his 13-year presidency, which began in 1990, Yates provided leadership that significantly advanced this goal, seeking, in his words, to “always turn adversity to advantage.” CSU emerged from the flood with an enhanced sense of community, and its rebuilt campus was functionally and aesthetically superior to the earlier one. Under Yates, the quality of undergraduate and graduate education and research steadily improved, along with opportunities for women and underrepresented minorities. Faculty such as Temple Grandin, Stanley Shumm, George Seidel, Stephen Withrow, Diana Wall, and Holmes Rolston achieved international renown, thereby enhancing CSU’s scientific and scholarly stature.

Intercollegiate athletics also flourished. Sonny Lubick’s winning football program, formation of the Mountain West Conference, and unprecedented success for women’s teams highlighted this trend. Olympic champion swimmer Amy Van Dyken and basketball All-American Becky Hammon were among the school’s best-known athletes.

Recently, CSU, like most public universities, has been severely tested by state, national, and global economic problems, along with competition for students by peer institutions and proliferating online academic programs. It has responded by diversifying resources, maintaining fiscal stability, and pursuing appropriate goals. For example, environmentalism has become an institutional objective, rekindling CSU’s longstanding research and teaching expertise in this realm. The university has emphasized science, technology, engineering, and mathematics education, while concurrently promoting the values of international understanding and responsible community involvement. It has also launched a significant building program that initially benefited from bargain construction savings during the Great Recession and consistently low interest rates. Additions included: living-learning residence halls, technology-enabled classrooms, a totally refurbished Student Center, and an on-campus stadium. Rarely has CSU’s commitment to the “power of place” been more evident than in the transformational character of its campus during the past decade - functionally, aesthetically, and sustainably.

Anthony A. Frank, inaugurated as CSU’s president in 2009, facilitated these changes. A faculty member since 1993, he subsequently held key administrative positions and worked actively to advance institutional priorities that embodied its land-grant educational heritage. Frank’s ten-year presidency emphasized academic excellence and the principles of inclusion, service, and social justice – thus providing an excellent foundation for Joyce McConnell, who became the 15th president of the institution on July 1, 2019. Just a few months into this position (leading up to the 150th anniversary of CSU’s founding) McConnell introduced the Race, Bias and Equity Initiative – designed to promote a welcoming and safe environment for the entire campus community. In 2020, she led the coordination of CSU research teams, administrators, and facilities staff in implementing proactive protocols to address the COVID-19 pandemic.

Today, tradition finds renewal in the academic ceremony of commencement – simultaneously celebrating past accomplishment, transition, and future promise. Since 1884, Colorado State University has bestowed 289,114 degrees. At present, 27,954 on-campus students, representing 106 nations, receive instruction from 1,872 faculty in eight separate colleges, plus the Graduate School and Libraries. Research expenditures total $447.2 million annually. This vitality is rooted in a dynamic legacy that enables Colorado State University to address the challenges of the post-9/11 era. Historically, this school has embraced democratic opportunity, rewarded competence and merit, and instilled perseverance. It has advanced wisdom as well as knowledge. These values are crucial to sustaining human civilization in the 21st century.

Board of Governors of the Colorado State University System

The Board of Governors consists of 15 members, 9 of whom are appointed by the governor of Colorado to serve four-year terms as voting members. Voting members may be appointed to a maximum of two four-year terms. The 6 non-voting members represent Colorado State University, Colorado State University-Pueblo, and Colorado State University-Global Campus. One faculty member and one student leader are representatives from each university.

Dr. Kemba Marshall, Commencement Speaker,
Director of Veterinary Services, Land O’ Lakes Purina Animal Nutrition Center

Dr. Kemba L. Marshall, the Director of Veterinary Services for the Land O’ Lakes Purina Animal Nutrition Center, earned her Doctor of Veterinary Medicine degree from the University of Florida in 1999. After a one-year private practice internship, she completed a residency in Avian and Exotic Animal Medicine at the University of Tennessee College of Veterinary Medicine and is a boarded specialist of the American Board of Veterinary Practitioners. Dr. Marshall earned her Master’s in Public Health degree from the University of Iowa in 2018. Last year, Kemba founded Marshall Recruiting Consortium, which focuses on improving the pipeline of diverse, talented job applicants in both animal sciences and agricultural settings. Her home base is St. Louis, Missouri, but her heartbeats (her mom and dad) live in Jacksonville, Florida.

Amy Hoeven, Commencement Speaker
Amy Hoeven is from a small rural town on the eastern plains and is a fourth generation native of Colorado. After she graduated from CSU in 1995 with a degree in Liberal Arts, she used her Communications and Technical Journalism training to pursue a career in communications and community outreach in both the for-profit and non-profit sectors. In 2010, Amy was named Young Professional of the Year by the Fort Collins area Chamber of Commerce. Amy understands the importance of storytelling and believes everyone's story adds value to their communities. In 2017, she was the Executive Producer of Who I Am, a Virtual Reality documentary film showcasing the work of first-generation CSU students mentoring immigrant and refugee high school students in Fort Morgan. Her ability to observe the environment around her, interact with people, and recognize human connections allows her to be a compassionate and active member of society.

**Dr. Lubna Tahtamouni, Commencement Speaker**

Lubna Tahtamouni, a visiting senior research scholar, is a full professor in the Department of Biology & Biotechnology at the Hashemite University, Jordan, where she has been a faculty member since 2005 and served as a chair for two terms. Lubna completed her Ph.D. at Colorado State University and her Master’s and undergraduate studies at University of Jordan.

Her research focuses on cellular alternations in actin cytoskeleton and actin-binding proteins leading to cancer initiation and development. This information can help in creating and improving cancer treatments. Lubna has been successful in securing university and governmental grants for her research. She has many international peer-reviewed publications and has served on many conference and workshop program committees.

Lubna has always been a strong voice calling for the support and empowerment of Arab female students and scientists: as such she has recently represented the Mediterranean Levant region as a woman leader in the EU-funded RAISA program held in Spain, and has been awarded several national and international awards, among these the 2018 Small Grants Program, Public Affairs Section, U.S. Embassy-Jordan; the 2018 NCI Summer Cancer Prevention Fellowship; National Institutes Health (NIH); the 2018 Arab-American Frontiers Fellowship, U.S National Academy of Sciences; the 2017 Outstanding Women in Science, Venus International Foundation, India; the 2016 BBC List of the World’s 100 Most Inspirational and Influential; the 2015 Women in Science Hall of Fame, U.S. Embassy-Jordan; the 2013 Colorado State University Distinguished International Alumni Award; the 2012, 2016, and 2017 College of Natural Sciences Summer International Scholars Program Award; the 2011 L’OREAL-UNESCO for Women in Science Fellowship; and the Organization for Women in Science for the Developing World (OWSD) Award for Young Women Scientists in Biology.

Ms. Noel Marshall, Commencement Speaker

Ms. Noel Marshall earned her Mechanical Engineering degree with a Mathematics Minor at Colorado State University.

As the Senior Account Executive for Schaeffler, Noel focuses on developing, managing, and creating new markets within the Drive-by-Wire space for autonomous and semi-autonomous applications in North America. She implements business development initiatives and provides market intelligence within the transportation space, while helping to manage the various technical projects that are on-going today.

She has a passion for technology as it relates to the automotive industry and seeks to impact the future of transportation and mobility. Her notable contributions to advancing inclusive design include modifying both a 2014 and 2016 Chevrolet Corvette for the Semi-Autonomous Motorcar Project (SAM Car Project) with drive-by-wire and ADAS technology to enable someone who suffers from quadriplegia to drive again. She holds a patent for a zero-power electro-mechanical switch for air flow applications. Her expertise includes technical project management, drive-by-wire applications, 12V systems, 3D CAD modeling, wiring, CAD thermal simulations, CFD stress/strain simulations, and mathematics.

She was honored with two awards in 2017. The first was Women of M2M/IoT by Connected World magazine. The other was Women Worth Watching in STEM by the Profiles in Diversity Journal, for her work on the SAM Car Project.

The Mace  
The mace, originally a weapon of offense, has long been the insignia of authority. The mace carried in today’s ceremony was presented to Colorado State University by the College of Natural Resources in 1981. The three-and-half-foot black walnut staff, surmounted by a carved rams head, is embellished in silver with the emblems of Colorado State University and the State of Colorado.
