ALMA MATER

Hail To Thee, Our Alma Mater, Colorado State.
Memories Are Everlasting Of This Place So Great!
May Thy Green And Gold Unite Us, Loyal Ever Be.
Colorado State, Our Alma Mater, Hail, All Hail, To Thee.

COLORADO STATE UNIVERSITY SEAL

The Colorado State University seal is a modification of the official State of Colorado Seal, approved by the first General Assembly of the State of Colorado on March 15, 1877.

The seal consists of the eye of God within a triangle, from which golden rays radiate. Below the triangle is a bundle of birch or elm rods, wrapped with a scroll and around a battle axe bound by thongs. The scroll is called a Roman fasces and is the insignia of a republican form of government. The bundle of rods bound together symbolizes strength, which is lacking in the single rod. The axe symbolizes authority and leadership. Below the scroll is the heraldic shield bearing across the top three snow-capped mountains. The lower half of the shield has two miner’s tools, the pick and sledge hammer, crossed on the ground.

As the University evolved, the seal was updated to reflect changes to the school’s name. The original name was the State Agricultural College. In 1935, the name changed to Colorado State College of Agricultural and Mechanical Arts. In 1957, the name was again changed – this time to Colorado State University.

The original seal was made of hand-tooled leather. Damaged during the campus flooding of 1938, the original border was cut away in a random and arbitrary fashion and stitched back down on a new piece of leather in a scallop-like manner, giving the seal its current appearance.
**Principles of Community**

The Principles of Community support the Colorado State University mission and vision of access, research, teaching, service and engagement. A collaborative and vibrant community is a foundation for learning, critical inquiry, and discovery. Therefore, each member of the CSU community has a responsibility to uphold these principles when engaging with one another and acting on behalf of the University.

**Inclusion:** We create and nurture inclusive environments and welcome, value and affirm all members of our community, including their various identities, skills, ideas, talents and contributions.

**Integrity:** We are accountable for our actions and will act ethically and honestly in all our interactions.

**Respect:** We honor the inherent dignity of all people within an environment where we are committed to freedom of expression, critical discourse, and the advancement of knowledge.

**Service:** We are responsible, individually and collectively, to give of our time, talents, and resources to promote the well-being of each other and the development of our local, regional, and global communities.

**Social Justice:** We have the right to be treated and the responsibility to treat others with fairness and equity, the duty to challenge prejudice, and to uphold the laws, policies and procedures that promote justice in all respects.

**Land Acknowledgment**

Colorado State University acknowledges, with respect, that the land we are on today is the traditional and ancestral homelands of the Arapaho, Cheyenne, and Ute Nations and peoples. This was also a site of trade, gathering, and healing for numerous other Native tribes. We recognize the Indigenous peoples as original stewards of this land and all the relatives within it. As these words of acknowledgment are spoken and heard, the ties Nations have to their traditional homelands are renewed and reaffirmed.

CSU is founded as a land-grant institution, and we accept that our mission must encompass access to education and inclusion. And, significantly, that our founding came at a dire cost to Native Nations and peoples whose land this University was built upon. This acknowledgment is the education and inclusion we must practice in recognizing our institutional history, responsibility, and commitment.
Spring 2022

Dear Graduates,

Congratulations! On behalf of everyone at CSU – our faculty, our staff, and your fellow graduates and students – I am so excited to celebrate your graduation from Colorado State with you. This is an extraordinary achievement. Savor it, and take pride in being able to call yourselves alumni of Colorado State University. Our alumni make up a worldwide fellowship of amazing people like you.

You leave here with the knowledge you’ll need to succeed in your chosen careers and the creativity and critical thinking you’ll need to be life-long learners. You will gain wisdom with every experience. You will be ready to transform yourselves when opportunities and challenges arise.

These past few years presented you with challenges other generations of Rams did not face. But you pushed on to make it to this moment – your Commencement ceremony – and to officially receiving the degree that you worked so hard to earn. Your perseverance has already put you on a path to success; your resilient spirit will carry you forward.

This is just one stop in your path. As you move on to the next phases of your lives, you will always be Rams and will remain members of the larger CSU community, characterized by your brilliant minds and great hearts. Ours is a community that extends across our nation and around the globe. And today, more than ever, the world needs your brilliance to confront its increasingly complex challenges.

We are Colorado State University, all of us, together. We are one of the top public research universities in our nation because of you, because of our outstanding faculty and staff, and because of all those who came before us who are part of that growing, globe-spanning community. As a CSU alum, you exemplify the power of access to higher education and leave here prepared to make our world a better place.

I am so, so proud and thrilled for all of you, and excited about your accomplishments as students, your graduation, and the amazing things you will achieve next. Know that you make all of us at CSU proud – today, tomorrow, and far into the future.

Warmly,

Joyce E. McConnell
President

Colorado State University originated in 1870 when the territorial legislature established an agricultural college at Fort Collins. This school qualified for endowment under the Morrill Act of 1862, which provided federal land grants to academic institutions offering instruction in “such branches of learning as are related to agriculture and the mechanic arts” and promoting “the liberal and practical education of the industrial classes in the several pursuits and professions of life.” Ideally, land-grant schools would make higher education more useful, accessible, and democratic.

Nearly a decade passed before classes began at Fort Collins, but in the interim, experimental work was conducted on the campus farm. How could the emerging modern sciences of physics, chemistry, and biology be applied to Colorado’s distinctive agricultural conditions? Which were the most suitable methods of soil use, irrigation, crop selection, animal care, and pest control? Answers demanded careful study, which an agricultural experiment station would soon provide. Research thus preceded teaching.

On September 1, 1879, President Elijah E. Edwards and a two-member faculty welcomed the first students to the college. In the beginning, a single course of study served all, and the original graduating class – George H. Glover, Leonidas Loomis, and Libby Coy – received degrees on June 5, 1884. By the turn of the century, however, the curriculum included fully developed majors in agriculture, engineering, and home economics, along with fledgling graduate-level work. Dedicated faculty contributed to this development, among them James Lawrence, Clarence Gillette, Theodosia Ammons, and Elwood Mead. Mead, for example, introduced the first instructional program in irrigation engineering to be offered by an American college or university, and Lake Mead, Nevada, commemorates his subsequent professional esteem.

Outreach augmented research and teaching. Knowledge generated in Fort Collins could benefit Coloradans beyond the home campus, and in 1880, the college began offering farmers’ institutes at various locations. Eventually, extension agents would provide locally focused service in all Colorado counties and launch enduring programs, such as 4-H. Research, teaching, and outreach were all key college activities when Charles A. Lory began a 31-year tenure as president in 1909. A former ditch rider, whose family had homesteaded in Colorado, Lory imbued the school with a commitment to practical education and service to the state. During his presidency, enrollments grew from 217 to 2,048, and the college developed into a well-rounded technical institution. By 1940, degrees were available in agriculture, engineering, home economics, veterinary medicine, forestry, vocational education, agricultural economics, and rural sociology. Notable faculty of the Lory era included Inga Allison, Lawrence Durrell, Walter J. Morrill, Isaac E. Newsom, Elizabeth Forbes, and Ruth J. Wattles.

These years also featured extracurricular activities and campus traditions. Fraternity and sorority life, Coach Harry Hughes’ football teams, and painting the “A” all left indelible memories. So did the calamity of the Great Depression, which posed exceptional challenges for Colorado’s land-grant institution as it worked to mobilize outreach support for the state’s hard-hit rural areas.

American involvement in World War II threw normal college routines into disarray. Enrollments plummeted as students and faculty left Fort Collins for military service. Although the college remained open because of President Roy Green’s success in bringing military training programs to the campus, national defense rather than collegiate goals prevailed. Research and extension efforts strongly emphasized agricultural output.

The post-war years saw an influx of veterans attending college on the G.I. Bill. In addition, Cold War tensions led to vastly augmented federal support for scientific research and training. Sponsored projects proliferated, as did graduate programs.

William E. Morgan, who became president in 1949, led the school’s emergence as a modern educational institution. A prudent planner, he foresaw the need for major campus expansion, identified areas of excellence, and encouraged their development. In 1955, the college awarded its first Ph.D. degree (to Adrian R. Chamberlain) and two years later changed its name to Colorado State University. Curricular improvements in the liberal arts, library acquisitions, and international programs gave legitimacy to the title of “university.”

During the 1960s, enrollments soared from 6,131 to nearly 17,000, enabling gifted teachers, such as Willard Eddy and Meyer Nathan, to influence numerous students. Young people of this era also seemed determined to exercise an influence of their own by challenging perceived injustices. Concerns about racism, military power, environmental despoliation, discrimination against women, and rules governing student behavior provoked protests.

Adrian R. Chamberlain succeeded William E. Morgan as president in 1969 amid campus unrest that culminated in
the burning of the Old Main building in 1970. Chamberlain worked to consolidate university changes during a period of less rapid growth. By the conclusion of his 11-year tenure, the boom in American higher education had ended, along with the moral fervor of a youthful generation. Good jobs now elicited greater concern than good causes.

During the 1980s, Colorado State University faced many questions. Which programs would best serve a dynamic modern society? Could traditional commitments to agriculture and rural Colorado be balanced against escalating urban needs and international involvements? What role should computers and electronic networks play in facilitating education? The university addressed these and other critical issues despite administrative upheaval that featured three different presidents within a four-year period.

The 1990s imposed both new and traditional demands upon Colorado State University. Particularly notable was the flood of July 28, 1997. Despite devastating damage to the campus, including Morgan Library and the Lory Student Center Bookstore, CSU managed to start Fall Semester classes on time. This achievement reflected remarkable effort, which President Albert Yates defined as a challenge to make the university into “a better and stronger place in all of its dimensions.” During his 13-year presidency, which began in 1990, Yates provided leadership that significantly advanced this goal, seeking, in his words, to “always turn adversity to advantage.” CSU emerged from the flood with an enhanced sense of community, and its rebuilt campus was functionally and aesthetically superior to the earlier one. Under Yates, the quality of undergraduate and graduate education and research steadily improved, along with opportunities for women and underrepresented minorities. Faculty such as Temple Grandin, Stanley Shumm, George Seidel, Stephen Withrow, Diana Wall, and Holmes Rolston achieved international renown, thereby enhancing CSU’s scientific and scholarly stature.

Intercollegiate athletics also flourished. Sonny Lubick’s winning football program, formation of the Mountain West Conference, and unprecedented success for women’s teams helped propel Colorado State University to address the challenges of the post-9/11 era. Today, tradition finds renewal in the academic ceremony of commencement – simultaneously celebrating past accomplishments, transition, and future promise. Since 1884, Colorado State University has bestowed 289,114 degrees. At present, 25,745 on-campus students, representing 104 nations, receive instruction from 1,872 faculty in eight separate colleges, plus the Graduate School and Libraries. Research expenditures total $447.2 million annually. This vitality is rooted in a dynamic legacy that enables Colorado and the nation in controlling the spread of the virus and researching vaccine possibilities. In 2022, McConnell launched Courageous Strategic Transformation, a multi-year strategy to strengthen research discovery, ensure access to higher education, and strengthen ties with Colorado’s rural communities.

Recently, CSU, like most public universities, has been severely tested by state, national, and global economic problems, along with competition for students by peer institutions and proliferating online academic programs. It has responded by diversifying resources, maintaining fiscal stability, and pursuing appropriate goals. For example, environmentalism has become an institutional objective, rekindling CSU’s longstanding research and teaching expertise in this realm. The university has emphasized science, technology, engineering, and mathematics education, while concurrently promoting the values of international understanding and responsible community involvement. It has also launched a significant building program that initially benefited from bargain construction savings during the Great Recession and consistently low interest rates. Additions included: living-learning residence halls, technology-enabled classrooms, a totally refurbished Student Center, and an on-campus stadium. Rarely has CSU’s commitment to the “power of place” been more evident than in the transformational character of its campus during the past decade - functionally, aesthetically, and sustainably.

Anthony A. Frank, inaugurated as CSU’s president in 2009, facilitated these changes. A faculty member since 1993, he subsequently held key administrative positions and worked actively to advance institutional priorities that embodied its land-grant educational heritage. Frank’s ten-year presidency emphasized academic excellence and the principles of inclusion, service, and social justice.

Joyce McConnell became the 15th president of the institution on July 1, 2019. Amidst celebrating the 150th anniversary of CSU’s founding, McConnell coordinated the institution’s response to the Covid-19 pandemic with public health precautions, moving to multi-modal teaching and learning, and pivoting CSU’s research enterprise to support Colorado and the nation in controlling the spread of the virus and researching vaccine possibilities. In 2022, McConnell launched Courageous Strategic Transformation, a multi-year strategy to strengthen research discovery, ensure access to higher education, and strengthen ties with Colorado’s rural communities.

Today, tradition finds renewal in the academic ceremony of commencement – simultaneously celebrating past accomplishment, transition, and future promise. Historically, this school has embraced democratic opportunity, rewarded competence and merit, and instilled perseverance. It has advanced wisdom as well as knowledge. These values are crucial to sustaining human civilization in the 21st century.

**Board of Governors of the Colorado State University System**

The Board of Governors consists of 15 members, 9 of whom are appointed by the governor of Colorado to serve four-year terms as voting members. Voting members may be appointed to a maximum of two four-year terms. The 6 non-voting members represent Colorado State University, Colorado State University-Pueblo, and Colorado State University-Global Campus. One faculty member and one student leader are representatives from each university.

Armando Valdez, Vice Chair, CSU Board of Governors

A native of the San Luis Valley, Armando Valdez was raised near Capulin, Colo., on a farm and ranch consisting of cattle, sheep, small grains, and hay – Valdez Land & Livestock, LLC, which he continues to operate today, along with his wife and children. In addition to his passion for agriculture, Governor Valdez is an assistant professor of management, and the director of the Health Care Administration program in the School of Business at Adams State University (ASU). He was integral in the development of the Health Care Administration and the Agribusiness programs at ASU. In 2021, President Biden appointed him to serve as Colorado State Director of USDA Rural Development.

Governor Valdez is a member of the Conejos County Land Use Planning Commission, chair of the Conejos County Board of Adjustments, chair of the St. Joseph Parish Finance Committee, Board President of the Board for Guadalupe Parish Credit Union, a member of the 12th Judicial District nominating commission, and a member of the Nioxus Weed District for Conejos County. In November 2009, he was appointed by President Barack Obama to the USDA-Farm Service Agency Executive Committee for Colorado. In 2012, he was appointed as executive chair of this committee and served in that role until his term ended in 2018.

Empowering people and cultivating successful pathways for others are two of Governor Valdez’s key priorities. He believes we must facilitate opportunities for all within Colorado, which will enhance agricultural, economic, educational, and social interests while protecting rural and agricultural lifestyles.

General James Dickinson, Commencement Speaker
U.S. Army General James H. Dickinson is the Commander, U.S. Space Command, the 11th and newest unified combatant command. As Commander, he is responsible for defending U.S. and Allied interests in the space domain while providing space-enabled combat effects to joint warfighters around the world. He exercises combatant command authority over 18,000 Soldiers, Marines, Sailors, Airmen, and Guardians operating ground and space-based systems around the world that provide satellite communication, space domain awareness, offensive and defensive space control effects, and position, navigation, and timing services.

General Dickinson is a native of Estes Park, Colorado and commissioned from the Army Reserve Officers’ Training Corps at Colorado State University in 1981 where he received a Bachelor of Science in Mechanical Engineering. His graduate degrees include a Master’s of Science in Operations Research and Systems Analysis from the Colorado School of Mines and a Master’s degree in Strategic Studies from the United States Army War College.

General Dickinson has commanded at every level in the United States Army from Platoon to Combatant Command and is the Senior Air and Missile Defense Officer in the Department of Defense.

Sara Bovaird, ’22
Sara Bovaird is an Honors Program student, graduating magna cum laude with a B.S. in interior architecture and design and minor in global environmental sustainability. Sara cultivated her enthusiasm for learning and service through leadership at CSU. She held officer roles in two department student organizations and had an internship with the city of Sterling, Colorado, documenting historically significant buildings. Although her spring 2020 study abroad experience in Florence, Italy was cut short due to the pandemic, Sara made it an opportunity to align her passion for designing for human health and well-being with the world’s heightened health concerns for her senior capstone project and honors thesis. She hopes to continue in the healthcare field and looks forward to using design to create sustainable environments that foster growth, connectivity, and well-being.

Deirdre Sullivan, ’97
President and CEO, United Way of Larimer County

Deirdre Sullivan (B.S., human development and family studies, ’97) held student leadership roles and an internship, which led to her first job in social services, followed by work in direct services and policy efforts. She has shared her leadership and policy expertise through The Family Leadership Training Institute, a program of CSU Extension, and as a board member for The Family Center/La Familia and Health District of Northern Larimer County. She earned a Master's in Public Administration from University of Colorado Denver and was named 2017 College of Health and Human Sciences Outstanding Alumna and 2019 Bonfils-Stanton Foundation Livingston Fellow. Today, leading United Way of Larimer County, she continues her work in collaboration and engagement for the nonprofit sector, philanthropy, and our community. Her life and career connect with nearly every program in the College of Health and Human Sciences.

Dr. Jennifer Mueller, Commencement Speaker

Dr. Jennifer Mueller is a Professor of Mathematics and Biomedical Engineering at Colorado State University and a Professor Laureate in the College of Natural Sciences. She also holds a courtesy appointment in the Department of Electrical and Computer Engineering. She received her Ph.D. from the University of Nebraska-Lincoln and was an NSF Postdoctoral Fellow at Rensselaer Polytechnic Institute before joining the faculty at CSU in 2000.

Dr. Mueller is committed to research with a clinical impact. Her research encompasses the development of new hardware, reconstruction algorithms, and clinical applications for electrical impedance tomography and ultrasound acoustic tomography. Supported by the NIH, her work involves close collaborations with mathematicians, engineers, and physicians in the U.S. and abroad.

Professor Mueller currently serves as the Graduate Director in the Department of Mathematics and as an Associate Chair. This semester she is teaching a course on inverse problems with a focus on algorithms for medical imaging. As founder and director of the EIT lab, she provides her students with valuable experience doing hands-on data collection and interdisciplinary research.

Dr. Mueller serves as an Associate Editor for IEEE Transactions on Medical Imaging and the SIAM Journal on Applied Mathematics, Inverse Problems. She is co-author with Dr. Samuli Siltanen of the University of Helsinki, Finland, of the book Linear and Nonlinear Inverse Problems with Practical Applications, SIAM, 2012, and they are currently collaborating on a second book, Inverse Problems: A Data Science Perspective.

General James H. Dickinson,
Commencement Speaker

U.S. Army General James H. Dickinson is the Commander, U.S. Space Command, the 11th and newest unified combatant command. As Commander, he is responsible for defending U.S. and Allied interests in the space domain while providing space-enabled combat effects to joint warfighters around the world. He exercises combatant command authority over 18,000 Soldiers, Marines, Sailors, Airmen, and Guardians operating ground and space-based systems around the world that provide satellite communication, space domain awareness, offensive and defensive space control effects, and position, navigation, and timing services.

General Dickinson is originally from Estes Park, Colorado and commissioned from the Army Reserve Officers’ Training Corps at Colorado State University in 1981 where he received a Bachelor of Science in Mechanical Engineering. His graduate degrees include a Master's of Science in Operations Research and Systems Analysis from the Colorado School of Mines and a Master's degree in Strategic Studies from the United States Army War College.

General Dickinson has commanded at every level in the United States Army from Platoon to Combatant Command and is the Senior Air and Missile Defense Officer in the Department of Defense.

The Mace
The mace, originally a weapon of offense, has long been the insignia of authority. The mace carried in today’s ceremony was presented to Colorado State University by the College of Natural Resources in 1981. The three-and-half-foot black walnut staff, surmounted by a carved rams head, is embellished in silver with the emblems of Colorado State University and the State of Colorado.
